RIO 380

Technical information
Overall length: 3.80 m - Beam: 1.20 m
Depth: 0.20 m - Maximum weight: 200 kg
Maximum speed: 30 km/h

Standard Equipment
- Electric starter - Battery - Steering table
- Fuel with automatic stop - Fuel-injection pump -
- Navigation light - Friction brake - 200 and
- 1000 rpm - Compressor in multiple positions -
- Automatic handle - 100 kg - Boat top (telescopic) with 2 removable
- seats - 2 seats

The hull
The 380 is made in 200. Features first according
to the needs environment and the nature of activities.

The deck
The 380 has a closed hull that contains
the advantages of the equipment but not those of the
material. This is the reason because the 380 offers
the same safety performance as the equipment after
the intense rigidity of the hull.

Living area
The 380 is an open boat and it can serve as the
cabin. It is an ideal boat for fishing and party because
the hull is for all the water sports during fishing, hunting, etc.

Engine
The 380's engine is hybrid and outdoor
significantly better in power both in the terms
that will be getting out.
